

IRRIGATION

CONCRETE STRUCTURES, CONVERTING OPEN CHANNELS TO BURIED PIPE, DEVELOPING GEOGRAPHIC INFORMATION SYSTEMS: SCE HAS THE EXPERIENCE TO HELP MANAGE YOUR IRRIGATION DISTRICT AND CONSERVE YOUR RESOURCES.

Sage Civil Engineering has the experience, knowledge, and expertise required for virtually all irrigation projects. SCE has performed services for nearly all the irrigation districts in Wyoming's Big Horn Basin and has done so on many different types of projects, including numerous Wyoming Water Development-funded projects.

Each year we aid local districts in their quests to conserve water and reduce maintenance costs by placing irrigation laterals into pipe. Combined with these projects are concrete diversions, siphons, turnouts, and measurement structures. SCE has also designed numerous large canal control structures such as drops and checks. Sage provides staking, concrete testing, and construction observation for nearly all of these projects – whether completed by independent contractors or by the district's in-house personnel.

Geographic Information Systems are becoming a most convenient and necessary tool for the management of irrigation systems. SCE has developed GIS systems for several clients, including irrigation districts. The districts have begun relying heavily on the flexibility and accuracy the systems provide when tracking maintenance costs, facility condition, water rights, and more. We would appreciate the opportunity to show you how our knowledge and common-sense approach to developing a GIS will provide you with the technology to make everyday management of your district easier and better.

ENTITIES USING THE IRRIGATION-RELATED SERVICES OF SCE

- Shoshone Irrigation District
- Greybull Valley Irrigation District
- Lovell Canal Irrigation District
- Willwood Irrigation District
- Cody Canal Irrigation District
- Deaver Irrigation District
- Farmer's Canal Company
- Keystone Canal Company
- Highline Canal Company
- Lakeview Irrigation District
- Heart Mountain Irrigation District
- Big Horn Canal
- Bench Canal
- Trout Unlimited
